

AGRIMENT SERVICES Inc.

Animal Waste Management Systems

Agriment Services Inc. is proud to introduce the **Sludge Buster Boat** for sludge **REDUCTION** and removal in swine lagoons. The **STATE OF THE ART** Agitation Boat along with ASI Bio-Products gives us a new tool and advantage of dealing with sludge in swine lagoons.

We can agitate, treat, and remove sludge from your **WHOLE** lagoon using floating agitation. Fully remote controlled, powerful **VERTICAL agitation** brings solids off the bottom and creates a better chance for biological treatment and removal. This boat will **replace 3-4 lagoon pumps, tractors and fuel** on a large scale.

Minimize excess traffic causing bank damage and improve agitation and fuel efficiency.

ASK us about our proven bio-treatment and physical removal programs.
