 Burgaw, NC
 28425
 Permit No. 3

Completed hatch installation.

“Have you thought of taking advantage of Renewal Energy Programs by updating your waste management system? Most revisions require the addition of an Anaerobic Digester. Our lagoon-based digesters are among the most affordable and efficient farm systems anywhere. Our designs eliminate rainwater problems. You can power your farm and sell excess energy back to the grid. Please call Geno Kennedy at Agriment, we will prepare a professional quote to cover your lagoon or tank.”
