

FLOATING BARRIER BALLS

AN INNOVATIVE COVER SOLUTION
FROM THE WORLD'S LEADING COVER DESIGNER

FLOATING BARRIER BALLS

IEC's NEW FLOATING BARRIER BALLS

Introducing Floating Barrier Balls – an innovative floating cover system using high-density polyethylene (HDPE), water-filled balls.

These floating balls are made from the highest quality materials that are UV-resistant and durable in all weather conditions.

Barrier Balls cover over 91% of the surface of any pond, tank or lagoon, forming a barrier that reduces evaporation, energy consumption, odors, algae and deters wildlife.

The Perfect Cover Solution for a Wide Range of Applications

IEC's Floating Barrier Balls serves a wide range of industries and applications. Here are just a few ways these versatile floating balls have been used:

▲ INDUSTRIAL

When used in industrial applications, **Barrier Balls** significantly reduce the consumption of chemical products while limiting emission of toxic compounds.

▲ PROTECTION

Barrier Balls can be used for both human and wildlife protection. Airports use the balls to deter birds from glycol and storm-water basins, improving safety and reducing liability.

▲ MINING

Gold, silver and copper mining companies use floating **Barrier Balls** covers to keep wildlife out of processing ponds and reduce evaporation.

▲ AGRICULTURAL

Barrier Balls can be used in water storage tanks and irrigation basins to eliminate algae growth and evaporation.

ADVANTAGES & BENEFITS OF IEC's BARRIER BALLS

IEC's innovative barrier balls cover 91% of a basins surface area. The ball design and coverage have many benefits and advantages, including:

- ▲ **Eliminating up to 80% of evaporation**
- ▲ **Significantly reducing the emissions of toxic gases and odors**
- ▲ **Resists extreme wind due to the ballasted design**
- ▲ **Maintenance free and simple to install**
- ▲ **Allows easy access to aeration diffusers, floating aerators and mixers**
- ▲ **Reducing heat loss**
- ▲ **Reducing wildlife fatalities and contamination**
- ▲ **Reducing algae growth by blocking sunlight to halt photosynthesis**
- ▲ **Affordability, extreme durability and long lifespan**
- ▲ **And more!**

**At IEC, We ARE
the Cover Experts**

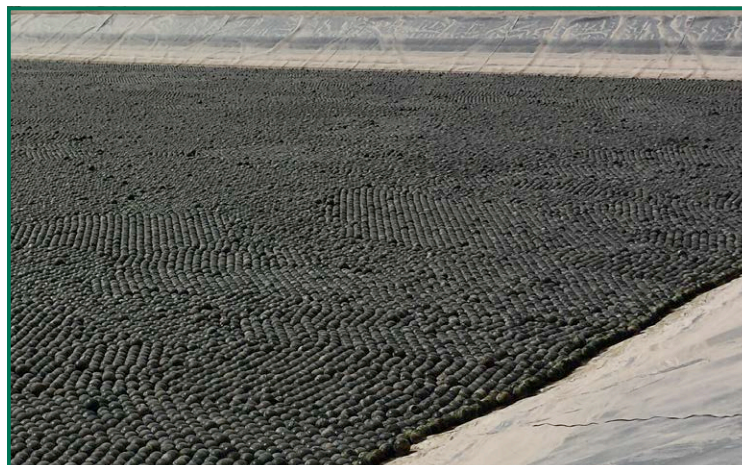

Industrial and Environmental Concepts (**IEC**) has been America's trusted cover designer and installer since 1993.

Clients from a wide range of industries and across four continents rely on our innovative cover designs and installations. That's because **IEC** engineers design each system to meet our client's specifications and operational requirements.

Our unique product designs and expertise provide the advantages you deserve and the quality you need. Our project management staff will work with you from initial design through installation.

We're proud to be a worldwide leader in the design, fabrication and installation of covers and liners.

**We look forward to hearing
about your next project!**
